MC GREEN

The MC GREEN project applies the internationally recognised ISO 17024 standard to ensure quality assurance in microcredentials within European vocational education. Based on an analysis of ISO requirements and current VET practices, two innovative micro-credential programmes in the green economy will be tested.

ISO 17024 process and requirements

FUNDAMENTALS OF ISO 17024

Certification according to ISO 17024 is **internationally recognised** to verify the competence of individuals through a standardised certification process. It ensures that certified individuals **meet the specified requirements** for knowledge, skills and abilities – in an objective, transparent and comprehensible manner.

PROCESS OF PERSONAL CERTIFICATION ISO 17024

ISO 17024 establishes a clearly structured process for certifying individuals in a **fair, objective and transparent manner**.
The process includes for example the development of a certification programme, the approval of examiners, an examination, certification, monitoring, recertification or complaint handling.

REQUIREMENTS FOR CERTIFICATION BODIES

Certification bodies that certify in accordance with ISO 17024 must meet strict requirements, like independence and impartiality, competent personnel, quality assurance and proof of conformity.
These ensure **reliability and transparency** throughout the certification process
